

DEVENDER GOPAGONI

Software Engineer · Full-Stack Developer · AI-ML Enthusiast

Nashik, India · +91 99496 69501 · devendhargopagoni@gmail.com · [Portfolio](#) · [LinkedIn](#) · [GitHub](#)

PROFESSIONAL SUMMARY

Results-driven Software Engineer with expertise in designing, building, and deploying scalable full-stack web applications. Proficient in modern JavaScript ecosystems (React.js, Next.js, TypeScript, Node.js) with a strong foundation in Python and AI/ML integration. Track record of shipping **6+ production-grade applications** with real users, optimized performance, and clean architecture. Passionate about solving complex problems through technology-driven business solutions and AI-powered automation.

EDUCATION

B.Tech in Computer Science & Engineering — Artificial Intelligence & Machine Learning

Sandip University, Nashik, India | **2024 — 2028** | **CGPA: 8.0+**

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Web Development, Database Management Systems, Machine Learning, Software Engineering, Computer Networks, Operating Systems

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frontend: React.js, Next.js, Tailwind CSS, Responsive Design, Accessibility (a11y), Performance Optimization

Backend: Node.js, Express.js, RESTful API Design, Authentication (JWT, OAuth), Middleware Architecture

Databases & Cloud: Supabase (PostgreSQL), Firebase, Vercel, Netlify, GitHub Actions

Tools & Practices: Git, GitHub, Agile/Scrum, CI/CD Basics, Code Review, Test-Driven Development

AI/ML: Python for Data Science, Scikit-learn, TensorFlow Basics, LLM Integration, Prompt Engineering, AI Tool Automation

SELECTED PROJECTS

PostLearn — Scalable Learning Management Platform

6+ pages · Responsive across all devices · Deployed on Vercel

- Architected and developed a full-featured learning platform with modern UI/UX, reusable component library, and optimized client-side routing.
- Implemented responsive design principles ensuring seamless experience across mobile, tablet, and desktop viewports.
- Deployed with Vercel edge network for sub-second global load times and automatic CI/CD pipeline integration.

Stack: Next.js 14, React.js, TypeScript, Tailwind CSS, Vercel | [Live Deployment](#)

EduCalc Expert — Full-Stack Education & Computation Platform

Real-time graph rendering · Supabase backend · Type-safe architecture

- Built a production-grade calculator platform with dynamic mathematical graph rendering and real-time computation engine.
- Designed and implemented RESTful API layer with Node.js/Express.js, integrated Supabase PostgreSQL for persistent user data and session management.
- Engineered responsive React UI with TypeScript for type safety, reducing runtime errors by 40% during development.

Stack: React.js, Node.js, Express.js, Supabase, TypeScript, REST APIs | [Live Deployment](#)

NoMoreDMs — AI Prompt Resource & Content Hub

Curated 100+ prompts · SEO-optimized · Scalable content architecture

- Developed a content-driven web application serving as a centralized hub for AI image and video generation prompts.
- Implemented scalable React component architecture with Next.js static generation for optimal SEO and performance.
- Integrated AI tool workflows (Midjourney, DALL-E, Runway, Pika) to demonstrate practical prompt engineering expertise.

Stack: Next.js, React.js, TypeScript, SEO Optimization | [Live Deployment](#)

TeamZ — Professional Business Landing & Corporate Website

Conversion-focused design · Cross-browser compatible · Lighthouse score 90+

- Designed and developed a professional business website with conversion-optimized landing pages and modern corporate aesthetics.
- Ensured cross-browser compatibility and accessibility compliance (WCAG 2.1 Level AA) for inclusive user experience.
- Achieved Lighthouse performance score of 90+ through image optimization, lazy loading, and code splitting strategies.

Stack: [React.js](#), [Next.js](#), [CSS3](#), [Netlify](#) | [Live Deployment](#)

Developer Portfolio — Personal Brand & Project Showcase

6+ projects showcased · **Custom domain** · **Continuous deployment**

- Engineered a developer-centric portfolio website to showcase technical projects, skills, and professional journey.
- Implemented smooth scroll animations, dark/light mode toggle, and contact form integration for professional networking.
- Established CI/CD pipeline with GitHub and Netlify for automatic deployment on every code push.

Stack: [React.js](#), [Next.js](#), [Netlify](#), [GitHub Actions](#) | [Live Deployment](#)

ACHIEVEMENTS & RECOGNITION

- Built and deployed **6+ production web applications** independently within first year of undergraduate studies
- Maintained **CGPA of 8.0+** while actively pursuing full-stack development and AI/ML coursework
- Self-taught modern JavaScript ecosystem (React, Next.js, TypeScript) through project-based learning and documentation
- Active contributor to open-source and developer communities; regularly explore startup models and AI-powered automation systems

CORE COMPETENCIES

Engineering: System Design · Scalable Architecture · API Development · Database Design · Performance Optimization · Security Best Practices

Leadership: Project Ownership · Cross-functional Collaboration · Technical Decision-Making · Code Review · Mentorship

Professional: Analytical Problem-Solving · Strategic Thinking · Effective Communication · Agile Methodologies · Continuous Learning
